

An interagency panel of distinguished experts in non-proliferation and threat reduction will address these topics:

- ▶ What are the evolving nonproliferation threats related to nuclear power, biotechnology, and other dual-use technologies?
- ▶ How well are the United States and other countries positioned to address these challenges?
- ▶ How can PNNL's capabilities—from basic science through technology development, deployment, and training—address emerging threats?

# Cooperative Threat Reduction: Past, Present, and Future

THURSDAY, JUNE 9, 2011

10:30 AM - 12:00 NOON • EMSL AUDITORIUM
